DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Randall McCarthy (Reg.No.39,297) on December 9, 2008.

The application has been amended as follows:

Claim 28 has been amended as follow:

28. (amended) An apparatus comprising: a first cantilevered assembly and a second cantilevered assembly each having an upstream leading edge and a downstream trailing edge, the first and second cantilevered assemblies being coupled to an actuator having a stack height; and a flow control device comprising a blower assembly and a nozzle having an elongated outlet having a dimension substantially corresponding to the stack which provide blowing pressure to the downstream trailing edge of said first and second cantilevered assemblies.

Claim 29 has been amended as follow:

29. (amended) The apparatus of claim 28, wherein the flow control device further comprises a nozzle coupleable to the blower assembly to supply the blowing pressure proximate to said the downstream trailing edges of said first and second cantilevered assemblies.

Allowable Subject Matter

1. Claims 28,29,31-46 and 48-51 (renumbered 1-22) are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent Claim 28 is allowable over the prior art of record since the references taken alone or in combination do not teach or suggest: an apparatus comprising: *"the first and second cantilevered assemblies being coupled to an actuator having a stack height; and a flow control device comprising a blower assembly and a nozzle having an elongated outlet having a dimension substantially corresponding to the stack which provides provide blowing pressure to the downstream trailing edge of said first and second cantilevered assemblies"* in combination with the other limitations in the claim.

Independent Claim 32 is allowable over the prior art of record since the references taken alone or in combination do not teach or suggest: an apparatus comprising *"a fluidic dam downstream of the cantilevered assembly; and a fluidic stripper upstream of the cantilevered assembly, the flow control device further comprising a nozzle coupled to the blower assembly positioned relative to a gap between the fluidic dam and the fluidic stripper"* in combination with the other limitations in the claim.

Independent Claim 34 is allowable over the prior art of record since the references taken alone or in combination do not teach or suggest: an apparatus comprising *"a flow control device comprising a blower assembly which provides blowing pressure to the downstream trailing edge, and wherein the flow control device further comprises a vacuum assembly which provides suction pressure to the upstream leading edge"* in combination with the other limitations in the claim.

Independent Claim 38 is allowable over the prior art of record since the references taken alone or in combination do not teach or suggest: an apparatus comprising: *a flow control device comprising a vacuum assembly which provides suction pressure solely to a region proximate the upstream leading edge,* in combination with the other limitations in the claim.

Independent Claim 44 is allowable over the prior art of record since the references taken alone or in combination do not teach or suggest: a method comprising “*supplying blowing pressure from a blower assembly to the downstream trailing edge; and supplying suction pressure from a vacuum assembly to the upstream leading edge*” in combination with the other limitations in the claim.

Independent Claim 48 is allowable over the prior art of record since the references taken alone or in combination do not teach or suggest: a method comprising “*supplying suction pressure proximate to the upstream leading edge without providing said suction pressure proximate to the downstream trailing edge*” in combination with the other limitations in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shimizu et al. (US 2002/0030924); Balster et al. (US 5,818,658); Dahlenburg et al.
